

## **OASIS**

April entered our shelter in the Spring of 2020 after losing custody of her three small children. When she entered the shelter, she was addicted to methamphetamines and at the lowest point in her life. April was able to attend substance abuse treatment, receive counseling for the years of domestic violence she endured and began working her case plan set by the Department of Community Based Services (DCBS). Throughout the duration of her stay at OASIS, April was able to maintain sobriety, safety, and began receiving visitation with her children.
