

Home Delivered Meals

Virginia was one of the workers and she retired. She was by herself way out in the country all by herself. Virginia fell in the floor, couldn't get up by herself and was in bad shape. This occurred over the weekend and was only found because a driver delivered her a meal on Monday and found her. She was immediately taken to the hospital where she had a head injury, numerous bruises and was disoriented and confused. I can't imagine what it must have been like to lay on the floor all by yourself, in pain and needing help. We are blessed to be able to help all of our seniors and give them peace of mind that someone will check on them daily.
